The Story of Tsuchiura Curry

The Tsuchiura Navy Air Service and the Relation of Tsuchiura Curry to the Graf Zeppelin

In the 1920s, the Tsuchiura Navy Air Service was established for naval aviation cadet training. At the time the Japanese Navy's organization was modeled after the British Royal Navy, even including the British tradition of having curry every Saturday. One function of this weekly curry night was to keep sailors from losing a sense of the days of the week during long spells at sea. It was also highly popular with the crewmen.

About 80 years ago, Kasumigaura received a remarkable visitor: the Graf Zeppelin landed here during its historic world-first round-the-world flight. The crew of the 236.5-meter airship was treated to curry made with the local potatoes, which were renowned for their flavor.

The city later explored ideas to raise Tsuchiura's domestic profile that culminated in the "Tsuchiura Curry Tales." Tsuchiura now has 26 locations in and around the city for enjoying the original curry.
